EDUCATION

- Lakshmi Narain College of Technology** Bhopal, India
 - Bachelor of Technology - CSE IOT; CGPA: 8.1* Sep 2023 - June 2027
 - Courses: Operating Systems, Data Structures, IOT, Networking, Databases*

SKILLS SUMMARY

- Languages:** C++, JavaScript, SQL, JAVA
- Frameworks:** React.js
- Tools:** GIT, MySQL
- Platforms:** Arduino, Window, Vscode, IntelliJ
- Soft Skills:** Leadership, Event Management, Public Speaking, Time Management

PROJECTS

- Jenovate - Analyzed user activity and course engagement data to understand learner behavior on the platform:**
(Work in progress) Tracked metrics such as sign-ups, retention, and course completion rates. Built dashboards. Cleaned and processed raw user data for accurate reporting and insights. Automated weekly reports, reducing manual effort and improving decision-making speed. Worked with the web/product team to optimize features based on data-driven insights (February'26)
Live Demo: <https://fabulous-frangollo-1e8419.netlify.app/>
- Smart Parking System using IoT:** AI model to resolve city traffic around 50% faster. Tech: *NodeMCU (ESP8266), IR Sensor, Servo Motor, Blynk, Embedded C*
 - Designed and built an IoT-based smart parking system to automate vehicle entry/exit
 - Used **IR sensors** to detect vehicle presence and **servo motor** to control gate operation
 - Programmed **ESP8266 (Wi-Fi enabled)** to send real-time data to mobile app
 - Integrated **Blynk app** for remote monitoring and slot availability tracking
 - Reduced manual intervention by automating parking management
 - Implemented real-time alerts and dashboard for status updates
- Location-based Travel Advisor Application using Google Maps and Places API:**
Tech: *React.js, Google Maps API, Google Places API, REST API, JavaScript, HTML, CSS*
 - Developed a location-based travel advisor application to discover nearby restaurants, hotels, and tourist attractions
 - Integrated **Google Maps API** to display an interactive map with real-time user location
 - Used **Google Places API** to fetch nearby places based on the user's current location
 - Implemented **REST API** calls to retrieve live place details, ratings, reviews, and photos
 - Added filtering functionality based on place type and user ratings for a personalized experience
 - Designed a responsive and user-friendly interface for seamless usage across desktop and mobile devices

CERTIFICATES

- Infosys IOT course Completion Certificate:** (February'26)
- CISCO Networking Academy : AI virtual Internship (December '25):**

PROBLEM SOLVING

- Solved 500 Leetcode problems across Leetcode and GeeksForGeeks:**
- Strong Fundamentals across topics like Arrays, Strings, Linkedlists, Greedy algorithm:**

HONORS AND AWARDS

- Top 3 Percentage on Chess.com:**
- Runner up in LNCT Mechanical Quiz'(March'2024):**
